WEBSITES/PROJECTS

Journeys.Cafe - A web app that is mobile friendly that allows users to create and share travel itinerary plans. Integrates with several services to allow for authentication, document/image uploads, monthly/yearly subscriptions, weather information, and currency conversion information.

Cecil-Thomas.com - Built using React.js with Typescript. Over 80% unit test coverage. Uses a custom built terminal-like interface to allow the users to execute commands to learn more about myself, and projects that I have worked on.

Frozenspade.Tv - Built using React.js and hosted on Netlify. Uses the SpeedRun.com api to pull in data on currently held world records for the Twitch streamer "Frozenspade". Full CI/CD pipeline between GitHub and Netlify to allow for rapid deployments.

Entrata, Lehi – *Software Development Manager*

June 2020 – March 2021

- Managed a project to remove a dependency on a third-party api, and replace it with our own custom built micro-service. Which saved thousands of dollars.
- Worked with my teams to reduce the open bug backlog from over 100 to less than 20.
- Facilitated development of new products that leveraged machine learning.
